EDUCATION

Bachelors of Computer Engineering McMaster University

09/2017 – 04/2021

- Data Structures, Algorithm and Discrete Math in Java
- Microprocessor, and Electromagnetism
- Logic Design: Combinational and Sequential circuits, Quartus II.
- Electrical Circuits: Designing circuits using OrCAD software

EXPERIENCE

Co-Founder & Integration Lead McMaster Hyperloop Team

01/2019 – Present

- Successfully contacted two professors to become a part of our team
- Selected 30+ undergraduate/graduate students via interviews
- Researching linear Induction Motors, CAN and Kalman Filters

Rocket Structure Designer McMaster University Rocketry Team

06/2018 – Present

Hamilton, Ontario

- Documented design-analysis of launch-rails for Sounding Rocket
- Led selection of rocket's nosecone via hand-computation/simulation
- Modeled rocket air-frame & nosecone on AutoDesk Inventor

Cooling System Designer McMaster University Formula Electric

11/2017 – 04/2018

Hamilton, Canada

- Modelled case for electromechanical sensor with SolidWorks
- Installed Formula Car parts (e.g. brakes) using Workshop Machinery
- Designed sensitive components (e.g. radiator, pump brackets)

Engineering Lead FIRST Robotics - J. Clarke Richardson Collegiate

09/2015 – 06/2017

Ajax, Canada

- Led school robotics team (#5076) to become a finalist in district level competition at Victoria Park event.
- Developed excellent communication skills by independently securing Lear Corporation sponsorship of \$3000 and mentorship
- Improved leadership and problem-solving skills by leading the Mechanical team of 3
- Refined my attention to detail by controlling the robot and delivered game-winning performance in the arena

SKILLS

C/C++

Java

Python

OpenCV

Linux

Git

Excel/Word/PPT

Raspberry Pi

Arduino

Assembly

HTML

CSS

Esduino uC

Bootstrap

Soldering

Autodesk Inventor

Solidworks

MATLAB

PROJECTS (FOUND ON GITHUB)

Delta Draw for DeltaHacks V (Jan 2019)

- A mechanized artist robot that draws any image you import (JPG) with a marker on a white board in under 40 minutes.
- Used FLASK for testing and developing a local server
- Designed a local tunneling system through NGROK for file transfer
- Tested the viability of a piece of code used to extract etch-a-sketch coordinates through IMAGE PROCESSING

Enhancing Face Identification using DSLR Camera (Dec 2018)

- Establish a connection between Unix system to access DSLR features. Currently exploring ways to display live feed from DSLR to Unix.

Tweet Sentiment (Dec 2018)

- Created a small program that asks the users to enter a word, which then return most return tweets off of Twitter along with its sentiment and factual value.

Web Scraper for StarterHacks (Jan 2019)

- Automated data-extraction (Python Script) of a Student University Account

Face Identification (Dec 2019)

- Used OpenCV, Numpy & PIL to write a facial identification program

ACHIEVEMENTS

3rd Place : DeltaHacks V (Jan 2019)

Awarded at McMaster University's annual hackathon with 160 teams
